#### IV. RESPONSE INFORMATION

During this reporting period, the following removal activities were conducted:

- Waste oil pumping, transporting, and off-site disposal operations continued. To date, approximately 169,332 gallons of waste oil have been transported off-site to an EPA-approved disposal facility for disposal.
- Waste water shipping continued. To date, approximately 185,614 gallons of waste water have been transported off-site to an EPA-approved facility.
- All of the approximately 15,836 gallons of solvent waste on site has been pumped from drums and tankers and transported to an EPA-approved facility for disposal.
- Results of groundwater testing indicated that the groundwater is not contaminated.
- The shears continued to cut up decontaminated tanks and other scrapable debris. To date, all ASTs have been cut up
- A track hoe was mobilized to site to dig out buried storage tanks, mix sludge, and excavate contaminated soil.
- The two pump houses were taken down.

1.3 4/20/98

- Non-hazardous debris is being disposed of and scrap metal is being recycled.
- The START contractor continued sampling, air monitoring, and site documentation activities.

## V. NEXT STEPS
